(O)-1108 (Rev. 6-81)

(PERMIT TERMS CONTINUED)

The design of the infiltration system or other disposal method and the delivery system to the site shall be submitted to the State Engineer for approval prior to any diversion of water. The permittee shall discharge water in a manner to achieve maximum conservation of the water resource. It is understood that this right must allow for a reasonable lowering of the static water level.

The State Engineer will retain the right to require additional monitoring of the water levels in observation and monitor wells and of the flow rates of surface sources. The permittee, on a schedule acceptable to the State Engineer, shall prepare and present an update on the activities of the mine and the monitoring on a periodic basis, but not less than two times per year.

This temporary permit does not extend the permittee the right of ingress and

egress on public, private or corporate land.

The issuance of this temporary permit does not waive the requirements that the permit holder obtain other permits from the State, Federal and local agencies and is specifically issued contingent upon approval by the Nevada Division of Environmental Protection of the dewatering project.

The total combined duty of water for consumptive purposes under Permits 49633, 49634, 50853, 50854, 52046, 52047, 52048, 52049, 52050, 52051, 53339, 53340, 53341, 58042, 58043, 58044, 58045, 60048, 60049, 60050, 60051, 60052, 60053, 60054, 60055, 60056, 60057, 60259-T, 60374-T, 60679-T, 60680-T, 60681-T, 61026-T, 61027-T, 61028-T, 61029-T, 61030-T, 61031-T, 61032-T, 61033-T, 61034-T, 61035-T, 61036-T, 61037-T and 61038-T shall not exceed 6,121.0 ACRE-FEET ANNUALLY. The total combined diversion rate of the above referenced permits shall not exceed 30.75 CUBIC FEET PER SECOND on an instantaneous basis.

This temporary permit is issued subject to and also incorporates the terms and conditions set forth in the State Engineer's Ruling No.3606, dated May 19, 1989.

This temporary permit is issued subject to <u>Stipulation to Withdraw Protests</u> of Lavar Murdock to Application Nos. 58041-58044, inclusive, dated October 14, 1994, and further issued subject to <u>Amendment to Stipulation to Withdraw Protests</u> dated December 21, 1994, on file in the office of the State Engineer in 58041.

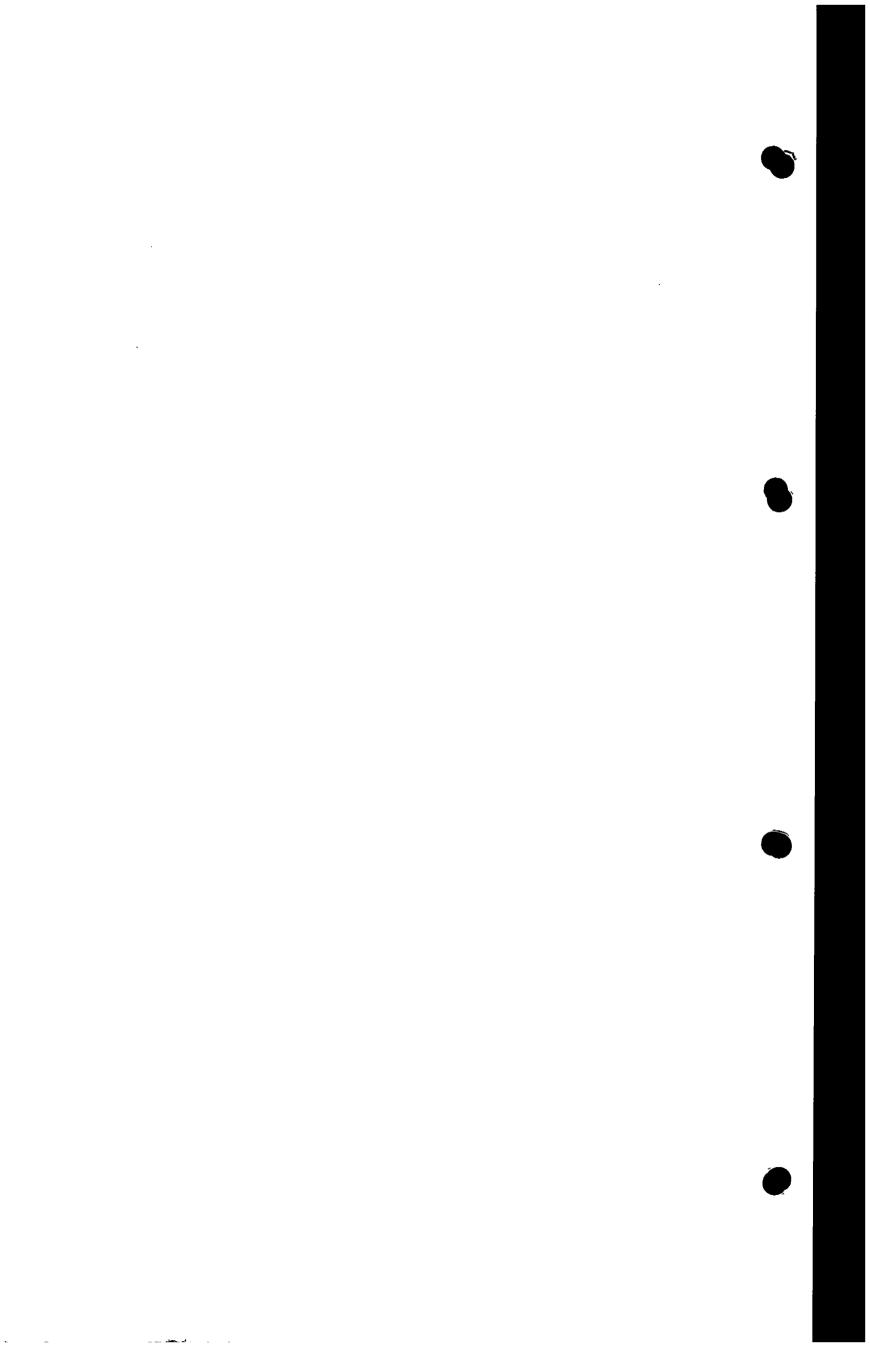

A monthly report shall be submitted to the State Engineer within 15 days after

A monthly report shall be submitted to the State Engineer within 15 days after the end of each calendar quarter which shall include: the volume of water pumped from each well, the measurement of pumping water level (drawdown) from each production well and each monitoring well, the volume of water consumptively used for mining and milling uses projectwide, and the amount of water discharged for infiltration.

A method that estimates the amount of evaporative losses from the discharge system shall be submitted with the monthly report. The evaporative losses will be considered as part of the combined duty for consumptive purposes.

All of the above stated conditions are issued subject to having no adverse impacts on existing rights.

This temporary permit is issued pursuant to the provisions of NRS 533.345 Section 2 and will expire on May 15, 1996 at which time all rights herein granted shall revert to the right being changed by this temporary permit.
